

AVAYA L100 SERIES HEADSETS

Communicate .

Collaborate .

Comfort .

Crystal Clear Sound .

AVAYA L100 SERIES HEADSETS

There are two primary reasons why employees prefer to use Avaya headsets - to improve their **audio experience** and to increase their **productivity**.

Studies suggest that employee productivity can be **increased by over 40%**, this is because both hands remain free to use a computer, make notes, handle documents.

In addition, the use of a headset can **improve posture** and **reduce back pain** and **fatigue** caused by cradling a phone handset on the shoulder—so that employees will always feel their best when handling important customer queries.

Maximize Your Business Communications Experience.

The Avaya L129 Headset

An entry-level, monaural headset breakthrough patented Acoustic Edge™ technology delivering crystal clear sound

The Avaya L159 Headset

A binaural headset that provides a premium experience and is designed to support all types of communications.

The headset consists of a 360-degree boom microphone and provides a Bluetooth interface for Bluetooth devices such as a personal smartphone.

Noise Cancellation

Best-in-class microphones that eliminate background noise—now you can focus and be productive when you are on an important call with your customers or having a meeting with your colleagues.

Safe and Harmless

Avaya's breakthrough patented AcousticEdge™ technology delivers crystal clear sound and protects employee hearing by limiting the effects of long-term acoustic exposure. The peak audio energy is limited to keep total daily exposure below the safety standard limits specified under Global Workspace Safety Standards.
